

## Talk:Client\_Bridged

Three statements which one is true?

### 1 New Wiki Material-Client Bridge

First of all, do not even try to do client bridge with dd-wrt SP1. It won't work.

### 2 Former Wiki Material

Client Bridge is said to be working with the old V23 SP2 build...but not the newest V24 builds.

### 3 V24 builds

Confirmed working on V24-Final V24-SP1 V24 Pre-SP2

=====

Ok, well just wanted to throw in a few points on this article.

Under Former Wiki material:

- host router is an Actiontec MI24-WR, via Verizon FiOs. Not Linux-based (as far as I know) and m

Under V24 Builds, in the setup as explained by redhawk:

- I can confirm it works with v24-sp2 (07/22/09) micro.

- Step 5 should also mention that Local DNS (after setting gateway) needs to be set to the same i
